CAREER OBJECTIVE

Final-year AI & Data Science student who builds and ships. I've deployed several full-stack products end-to-end, more than one born out of 24-hour hackathons. I work comfortably with Python FastAPI Flask and Postgres, and I've integrated LLM APIs like Claude Gemini Nvidia NIM and Ollama/LLaMA into real, working systems rather than just experimenting with them. I pick up new stacks quickly when a deadline demands it. I'm looking for a hands-on AI/Full-Stack Engineer role where I can build things end to end and take real ownership of how they perform.

EDUCATION

Dr. N.G.P. Institute of Technology, Coimbatore 2023 – 2027

B.Tech – Artificial Intelligence & Data Science | CGPA: 7.5

Kongu Vellalar Matric. Hr. Sec. School, Perundurai 2022 – 2023

Higher Secondary Education (HSE) | 73%

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML, CSS

AI / LLM: LLM API Integration (Claude, Gemini, Nvidia NIM, OpenRouter), Prompt Engineering, Ollama/LLaMA, Bio_ClinicalBERT, scikit-learn, HuggingFace Transformers, LangChain (basics)

Backend: FastAPI, Flask, REST API design, Neon PostgreSQL, SQLite, Firebase

Frontend: React (basics), HTML, CSS, JavaScript

DevOps & Deployment: Git, GitHub Actions, n8n, Docker (basics), Vercel, Render, ngrok, VS Code

PROJECTS

RetailIQ — Customer Intelligence Platform · *FastAPI, React+Vite, XGBoost, K-Means* 2025

github.com/Manish7sgf/Retail-E-commerce-Customer-Behavior-Analysis

- Built a full-stack customer analytics platform with a FastAPI backend (15+ REST endpoints) and a React+Vite frontend with interactive Chart.js dashboards.
- Implemented XGBoost churn prediction (with Random Forest fallback), K-Means RFM segmentation, CLV forecasting, hybrid product recommendations, and multi-touch marketing attribution.
- Deployed frontend on Vercel and backend on Render, with CSV upload, synthetic dataset generation, and route-level caching.

AI-Passport — AI Employability Ecosystem · *React, Vite, Node.js, Neon PostgreSQL, Nvidia NIM* 2026

github.com/Manish7sgf/AI-Passport

- Built a full-stack employability platform with a Resume Analyzer, Job Matcher, and Career Roadmap Generator powered by Nvidia NIM / LLaMA 3.1 70B.
- React + Vite + Zustand frontend, Node.js + Express + Neon PostgreSQL backend, deployed on Vercel and Render.
- Built for CodeZap Hackathon; featured by the Descience Open Source Club.

HealBot — Self-Healing CI/CD Pipeline Agent · *Node.js, Express, GitHub Actions, n8n, Ollama* 2026

github.com/Manish7sgf/healbot-demo

- Built an autonomous CI/CD agent that detects pipeline failures and auto-generates fix patches, cutting mean-time-to-recovery to under 2 minutes in testing.
- Built a Node.js/Express REST API with a real-time dashboard for live job-state updates and one-click pipeline re-runs.
- Designed and demoed end-to-end at a 24-hour hackathon, Nandha College of Engineering, Erode (2026).

MediMate — AI Medical Symptom Assessment System · *FastAPI, Bio_ClinicalBERT, Python* 2025

github.com/Manish7sgf/Medimate

- Designed a 5-state conversational intake pipeline converting free-text symptoms into structured, ML-ready diagnostic features, with red-flag emergency detection.
- Built human-confirmation checkpoints and dataset-aligned validation to reduce mis-triage risk in ambiguous cases.

github.com/Manish7sgf/NOVA-AI

- Built a responsive AI chat web app with multi-model switching, voice input, file upload, and secure API-key handling.
- Optimized page load and real-time interaction performance across devices.

JARVIS — Offline Voice Assistant · Flask, Ollama/LLaMA, SpeechRecognition, OpenCV

2024

- Built a locally hosted Flask app with speech recognition, text-to-speech, and LLM integration - fully offline, with bilingual English-Tamil support.
- Integrated OpenCV + MediaPipe for gesture-based control and built REST endpoints for system-level commands (app launch, file management).

Offline AI Chatbot — Local LLM via llamafile · Python, Gemma, llamafile

2024

github.com/Manish7sgf/AI-Powered-Chat-Bot-

- Deployed a Gemma model via llamafile for fully offline inference with zero cloud dependency, called from a Python frontend through a local API.
- Applied quantized model execution for a privacy-first, local-first AI setup.

INTERNSHIP

Blue IT Solutions — Web & AI Development Intern (On-site)2025

- Short, 15-day on-site introduction to the AI domain worked on a web-based AI assistant interface, getting first hands-on exposure to front-end design and API integration workflows.
- Gained an early, practical view of end-to-end product development: UI design, backend logic, and deployment.

CERTIFICATIONS

- Human Computer Interaction (NPTEL, IIT Madras) | Score: 98%, top 5% | Jan–Apr 2026
- The Python Programming A-Z Definitive Diploma | Udemy
- Power BI for Beginners | Simplilearn

ACHIEVEMENTS & HACKATHONS

- Participant — CodeZap Hackathon, built AI-Passport Employability Ecosystem (2026)
- Built Self-Healing CI/CD Pipeline Agent — Nandha College 24-Hour Hackathon, Erode (2026)
- Paper Presentation — Skin Cancer Detection, Info Institute of Technology, Coimbatore (2025)
- Paper Presentation — Personal Voice Assistant, Karpagam Engineering College, Coimbatore (2024)
