

MANISH VARMAN M

B.Tech Artificial Intelligence & Data Science, 2027

manishvarman5@gmail.com | +91 9791431438 | [LinkedIn](#) | [GitHub](#) | Coimbatore, Tamil Nadu

CAREER OBJECTIVE

Final-year B.Tech student in Artificial Intelligence & Data Science with hands-on experience building and deploying full-stack web applications, REST APIs, and AI/ML-powered systems. Proficient in Python, JavaScript, FastAPI, Flask, React, and LLM integration with multiple production-ready projects live on GitHub and Vercel. Seeking a Software Developer / Full Stack / AI Engineer role to contribute practical technical skills on live industry projects while growing within a results-driven team.

EDUCATION

Dr. N.G.P. Institute of Technology, Coimbatore B.Tech – Artificial Intelligence & Data Science CGPA: 7.5	2023 – 2027
Kongu Vellalar Matric. Hr. Sec. School, Perundurai Higher Secondary Education (HSE) 73%	2022 – 2023

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, HTML, CSS, SQL
Frameworks & Libraries: FastAPI, Flask, Node.js / Express, React (basics), scikit-learn, HuggingFace Transformers
AI / ML: Prompt Engineering, Bio_ClinicalBERT, Ollama / LLaMA, Google Gemini API, OpenRouter, LangChain (basics)
DevOps & Tools: GitHub Actions, n8n, ngrok, Docker (basics), vercel, Render, VS Code, Git
Databases: SQLite, Neon PostgreSQL, SQL, Firebase

PROJECTS

HealBot – Self-Healing CI/CD Pipeline Agent <i>Node.js · Express · GitHub Actions · n8n · Ollama</i> github.com/Manish7sgf/healbot-demo - Engineered an autonomous CI/CD agent that detects pipeline failures and auto-generates fix patches, reducing mean-time-to-recovery to under 2 minutes. - Built a Node.js/Express REST API backend with a real-time web dashboard and live job-state updates for one-click pipeline re-runs. - Designed and demoed end-to-end at Nandha College of Engineering (24-hour Hackathon), Erode (2026).	2026
RetailIQ — Customer Intelligence Platform <i>FastAPI, React+Vite, XGBoost, K-Means, scikit-learn</i> github.com/Manish7sgf/Retail-E-commerce-Customer-Behavior-Analysis - Built a full-stack customer analytics platform with FastAPI backend (15+ REST API endpoints) and React+Vite frontend featuring Chart.js interactive dashboards - Implemented XGBoost churn prediction model (with Random Forest fallback), K-Means RFM customer segmentation, CLV forecasting, hybrid product recommendations, and multi-touch marketing attribution - Deployed frontend on Vercel and backend on Render; features CSV upload APIs, auto-generated synthetic datasets, and route-level caching for performance - Tech: Python, FastAPI, pandas, numpy, scikit-learn, XGBoost, React 18, Vite, Chart.js, unicorn	2025
MediMate – AI Medical Symptom Assessment System <i>FastAPI · Bio_ClinicalBERT · Python</i> github.com/Manish7sgf/Medimate - Designed a 5-state conversational intake pipeline that converts free-text symptom input into structured, ML-ready diagnostic features with red-flag emergency detection. - Built human-confirmation checkpoints and dataset-aligned validation to ensure clinical safety and prevent mis-triage in ambiguous scenarios.	2025
HealthMate – Multilingual Public Health Chatbot <i>FastAPI · SQLite · JWT · OpenRouter</i> - Built a full-stack chatbot supporting 5 Indian languages (Tamil, Hindi, Telugu, Malayalam, Tanglish) with emergency-detection triggers and symptom-severity triage. - Implemented JWT authentication, SQLite session management and multi-model LLM fallback with retry logic, maintaining >99% availability on free-tier infrastructure. - Designed accessible, mobile-responsive UI for diverse, low-literacy populations.	2025

NOVA AI – Multi-Model AI Chat Application *HTML · CSS · JS · Google Gemini API* 2025

github.com/Manish7sgf/NOVA-AI

- Built a responsive, production-grade AI chat web app with multi-model switching voice input, file upload and secure
- API key handling.
- Optimised page load and real-time interaction performance across devices.

Offline AI Chatbot — Local LLM via llamafile *Python, Gemma, llamafile, local REST API* 2024

github.com/Manish7sgf/AI-Powered-Chat-Bot-

- Deployed Gemma model using llamafile.exe for fully offline inference with zero cloud dependency; integrated via local API calls from Python frontend
- Demonstrated practical knowledge of local LLM deployment, quantized model execution, and privacy-first AI architecture

JARVIS – Offline Bilingual Voice Assistant Web App *Flask · Ollama/LLaMA · SpeechRecognition · OpenCV* 2024

- Developed a locally hosted Flask web application with speech recognition, text-to-speech and LLM integration - zero cloud dependency, bilingual English-Tamil support.
- Integrated OpenCV + MediaPipe for gesture-based control and built REST API endpoints for system-level commands (app launch, file management).

AI-Passport — AI Employability Ecosystem *React · Vite · Node.js · Neon PostgreSQL · Nvidia NIM* 2026

github.com/Manish7sgf/AI-Passport

- Built a full-stack AI employability platform with Resume Analyzer, Job Matcher, and Career Roadmap Generator using Nvidia NIM / LLaMA 3.1 70B.
- React + Vite + Zustand frontend, Node.js + Express + Neon PostgreSQL backend, deployed on Vercel + Render.
- Built for CodeZap Hackathon; featured by Descience Open Source Club.

EMI Calculator *React · Vite · Node.js · Neon PostgreSQL · Nvidia NIM* 2026

github.com/Manish7sgf/EMI-Calculator

- Built a clean, instant EMI calculator with real-time results, pie chart breakdown, and mobile-first responsive UI.
- Deployed live on Vercel as part of Digital Heroes internship trial task.

INTERNSHIP

Blue IT Solutions – Web & AI Development Intern (15 Days, On-site) 2025

- Designed and built a customised web-based AI assistant interface, applying front-end design principles and real-world API integration workflows.
- Gained hands-on exposure to end-to-end product development: UI design, backend logic and deployment practices.

CERTIFICATIONS

- Human Computer Interaction (In English) - NPTEL, IIT Madras | Score: 98% (Topper, top 5%) | Jan–Apr 2026
- The Python Programming A-Z Definitive Diploma - Udemy
- Power BI for Beginners - Simplilearn

ACHIEVEMENTS & HACKATHONS

- Participant — CodeZap Hackathon, built AI-Passport Employability Ecosystem (2026)
- Built Self-Healing CI/CD Pipeline Agent at Nandha College 24-Hour Hackathon, Erode (2026)
- Paper Presentation – Skin Cancer Detection | Info Institute of Technology, Coimbatore (2025)
- Paper Presentation – Personal Voice Assistant | Karpagam Engineering College, Coimbatore (2024)

PERSONAL DETAILS

Languages: Tamil, English

Date of Birth: 13 February 2006
